ABOUT ME

Passionate individual eager to begin a data analysis career. Proficient in data manipulation, visualization, and statistics. Strong problem-solving skills with complex data interpretation abilities. Committed to delivering actionable insights.

PROJECTS

2023

HR Dashboard

This HR data project in Tableau for Company H aimed to analyze key metrics like turnover rates, performance ratings, demographics, and training completion to gain insights into employee performance and satisfaction. Interactive dashboards enabled HR managers to track trends, identify areas for improvement, and make data-driven decisions to enhance employee engagement and organizational effectiveness.

2023

Airline Dashboard

The Tableau project visualized airline routes, destinations, and statistics, offering insights into airline connectivity, popular destinations, and arrival patterns. With interactive dashboards, users could explore route networks, analyze traffic volumes, and identify trends to inform decision-making in the aviation industry.
